EPILEPSY WARNING

READ BEFORE USING YOUR SEGA VIDEO GAME SYSTEM

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or while playing video games may induce an epileptic seizure in these individuals. Certain conditions may induce undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game: dizziness, altered vision, eye or muscle twitches, loss of awareness, disorientation, any involuntary movement, or convulsions, IMMEDIATELY discontinue use and consult your physician before resuming play.

HANDLING YOUR CARTRIDGE

- This Sega Genesis 32X™ Cartridge is intended for use exclusively with the Genesis 32X™.
- Do not bend it, crush it or submerge it in liquids.
- Do not leave it in direct sunlight or near a radiator or other source of heat.
- Be sure to take an occasional break during extended play, to rest yourself and the Sega cartridge.

Warning to owners of projection televisions: Still pictures or images may cause permanent picture-tube damage or mark the phosphor of the CRT. Avoid repeated or extended use of video games on large-screen projection televisions.

ONLY THE STRONGEST SURVIVE

In a frantic attempt to escape a lifetime of hard labor on an interstellar mining project, a shipload of criminals have hijacked their prison barge and used it to ram a military cruiser. The damage was extensive—only four members of each ship survived.

The prison barge is completely useless. Power and life support on the military cruiser are fading fast, and all the escape pods have been destroyed, except one... and that pod has room for only one passenger.

Eight beings from eight different worlds, either criminals or professional soldiers, are all desperate to survive. There is only one way to determine who will escape and live, and who will die.

Play against the computer, or challenge a friend. Select one of the soldiers from the barge and choose between two different kinds of battle armor. Or select one of the fugitives and rely on your best natural resources. Then step into the arena. Use all the special moves at your disposal, and pay close attention to how your opponents use theirs.

Your life depends on it.

GETTING STARTED

Following the Sega™ logo is a brief game introduction, then the Title screen appears. Press Start at any time to bring up the Game Menu.

ONE PLAYER pits your warrior against computer-controlled opponents in a series of matches. TWO PLAYERS lets you challenge a friend to a duel. OPTIONS allows you to configure aspects of the game. Press the D-Pad up or down to select the desired feature, and press Start.

VIEW YOUR OPTIONS

Select OPTIONS and press Start to bring up the Option menu. Highlight an option by pressing the D-Pad up or down, and change features within highlighted option by pressing left or right. To exit the Options screen, press Start, or select EXIT and press any button.

Difficulty: How tough do you want your opponents in the One Player game? Level 1 is the easiest and Level 5 is the hardest.

Time Up: This sets a time limit on your battle. Turn this feature off for an unlimited time match.

Music Test and Sound Effect Test: Use these features to play the background music and sound effects used in the game. Press the D-Pad left or right to select the number of the track you wish to play, and press Button A, B, C, X, Y or Z to play the music or sound effect.

Controller Configuration: Customize the functions of the buttons on your Control Pad. Select this feature and press Button A, B, C, X, Y or Z. When the Configuration screen appears, press the D-Pad up or down to highlight the desired

function, then press the button you would like to use for that function. To return to the Options screen, press Start, or select EXIT and press any button.

LET THE CARNAGE COMMENCE!

SELECT YOUR FIGHTER

When you select a game and press Start, the Player Select screen appears. Use the D-Pad to highlight the desired fighter, and press Start. In a One Player game, the computer randomly chooses an opponent once you've chosen a fighter. In a Two Player game, both players must select a fighter and press Start to proceed to the next screen.

SELECT YOUR ARMOR

The Parts Select screen appears next. If you chose one of the soldiers (Tyr, Naruto, Cylic or Zena-Lan), you select the armor you want your fighter to wear. Press the D-Pad up or down to select the armor category and press left or

right to choose within that category. The special attacks you can use depend on the armor your fighter is wearing. Press the Punch, Kick and Provoke buttons to see how your fighter moves with the armor you've chosen. If you've chosen one of the fugitives from the prison barge, the screen shows that no armor is available. In a One Player game, the computer automatically selects armor (if available) for your opponent. Press Start to begin your match.

THE ARENA

Timer: You start each battle with 99 seconds computer time. When the Timer runs out, the battle ends and the fighter with the most Vitality remaining wins. If each combatant has the same amount of Vitality remaining when the Timer runs out, the battle is declared a draw. The Timer can be shut off in the Option menu.

Vitality: Each time a fighter is injured, a little bit of Vitality disappears from that fighter's Vitality bar. The fighter who runs completely out of Vitality loses the battle.

Victory: A match consists of a maximum of three battles. The first fighter to score two victories wins the match.

GAME OVER

ONE PLAYER GAME

When you win a match, the Player Select screen returns and the computer selects a new challenger to pit against your champion. The game ends when you either lose a match or defeat all your challengers. If you lose a match, the

Continue screen appears next. To continue at the same level of battle with the same fighter, press Start before the countdown reaches 0.

TWO PLAYER GAME

The game ends when either player loses a match. The Player Select screen appears next. The winner retains his or her champion while the loser has the option of selecting a new challenger.

THE MOVES

Here are the eight basic D-Pad positions used in the game. These positions are for a character facing RIGHT. Reflect the positions for a character facing left.

Punches and Kicks: The D-Pad directs the types of punches and kicks thrown when you press the Punch and Kick buttons. Experiment to see which works best with each fighter.

Jump: Press the D-Pad up. Guide your jumps by pressing left or right. While in midair, press the Punch and Kick buttons for vicious aerial attacks.

Crouch: Hold the D-Pad down. Then use the Punch and Kick buttons to trip up your enemy with low blows.

Guard: To brace against attacks, press the D-Pad away from your opponent. For a crouching guard, press the D-Pad down and away from your opponent.

Contact Moves: Some fighters are capable of close combat moves such as clawing, squeezing or throwing opponents. Move your fighter up to your opponent until they are touching, then press a punch or kick button. Or try one of the special attacks described on the following pages.

THE FIGHTERS

Those fighters who wear armor have two types of special attacks: one for light armor and one for heavy armor. The type of attack you can use depends on the part your fighter uses to attack (arms or legs) and the type of armor on that part.

All instructions are for a character facing RIGHT. Reverse the method for a character facing left.
